

Declaration on the European REACH Directive

In 2006, the European Union passed Regulation No 1907/2006 on the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH). The REACH regulations apply to all substances of very high concern (SVHC) that are on the published and regularly updated candidate list and are manufactured or imported in quantities of more than one ton per company and year, as well as to products that release the substances concerned.

The current candidate list can be viewed on the website of the "European Chemical Agency" ECHA (<https://echa.europa.eu/de/candidate-list-table>).

Anyone who manufactures these substances within the European Union or imports substances and preparations into the EU is required to register.

TAUBE ELECTRONIC is a "downstream user" in the sense of the REACH regulation and is not required to be registered. You purchase exclusively non-chemical products from us. In addition, no substance should be released from the products you purchase under normal and reasonably foreseeable use. Only substances and mixtures are used for production for which the required supplier documentation (EU-MSDS) is available according to the REACH regulation.

Furthermore, TAUBE ELECTRONIC assures to follow the updates of the REACH regulation, in particular the extensions of the SVHC candidate list and to compare them with the substance information.

TAUBE ELECTRONIC informs its customers without being asked as soon as information is available that listed substances above the concentration of 0.1 % specified by REACH are contained in the products supplied. These statements are based on our current knowledge and experience. No warranty or liability can be assumed for factors beyond our knowledge and control.

Please understand that measures that go beyond these requirements would represent a disproportionate effort for our company size, which we cannot afford from an economic point of view.
